Popular wrong answers.

This table identifies the wrong answer with the most selections for each question for each group.

Question	Year 6			Year 7			Year 8			Year 9			Year 10		
	Boys	Girls	All	Boys	Girls	All	Boys	Girls	All	Boys	Girls	All	Boys	Girls	All
1	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.	d. circle.
2	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	a. sheep.	c. people.	a. sheep.
3	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.	c. someone might see their password in their account.
4	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.	b. not meet under any circumstances.
5	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.	b. will always be quicker to draw.
6	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.	d. Apples, Oranges, Grapefruit and Pears.	c. Light takes 8 minutes to travel to Earth from the Sun.	d. Apples, Oranges, Grapefruit and Pears.	d. Apples, Oranges, Grapefruit and Pears.	d. Apples, Oranges, Grapefruit and Pears.	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.	c. Light takes 8 minutes to travel to Earth from the Sun.
7	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.	c. an example of computer processing and memory hardware.
8	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000	b. 3000

	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.	volts of electricity will be needed for 3000 connections.
9	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	a. Print a list of names.	b. Print the name of the user of the program.	a. Print a list of names.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.	b. Print the name of the user of the program.
10	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.	d. A computer model needs at least 1 GB of memory in the computer.
11	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.	b. The algorithm would be more efficient if instruction 3 was put before instruction 2.
12	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"	c. "PRINT count" should be moved after "MAKE count INTO count + 1"
13	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png	a. .png
